EDUCATION

BACHELORS'S IN COMPUTER APPLICATION

Chhatrapati Shivaji Maharaj University

2020-2023

HIGHER SECONDARY

Kendriya Vidyalaya Panvel

2018-2020

ABOUT ME

Full-stack developer with a passion for creating dynamic and user-friendly interfaces. Skilled in MERN stack development, with experience in building websites and web applications. My [portfolio website](#) showcases my skills and speaks volumes about my dedication and hard work in the field.

MY PROJECTS

StreamBeat

<https://streambeat.vercel.app/>

- Developed a cutting-edge web application merging movies and music services into one platform, offering users a seamless entertainment experience.
- Utilized React, Tailwind CSS, React Router DOM, Context API, Redux Toolkit, Node.js, Express.js, MongoDB, Swiper.js, bcrypt.js, and JWT to build a feature-rich and visually stunning application.
- Implemented intuitive UI for easy navigation, efficient state management for smooth data handling, and secure authentication using bcrypt.js and JWT.
- Hosted StreamBeat for worldwide access, providing a reliable and optimized user experience.

Alphamart

<https://alphamart.netlify.app/>

- Developed an impressive e-commerce website (Alphamart) using React and Redux for seamless state management.
- Implemented various user-friendly features, including wishlist, compare, favourite, cart, and responsive design to enhance user engagement.
- Utilized a modern tech stack, including React, Redux, and Tailwind CSS, to ensure efficient development and code organization.
- Backend and payment functionality are currently in progress, demonstrating commitment to continuous improvement and expansion of the website's capabilities.

Cloudbook

<https://cloudbookweb.netlify.app/>

- Developed a note taking website using React framework, Context API for state management, and Express.js, Node.js, and MongoDB for backend functionality.
- Implemented full CRUD operations for notes, allowing users to create, read, update, and delete their notes as needed.
- Incorporated user authentication and encryption using JWT and Bcrypt.js, ensuring secure access to the website and protecting sensitive user data.
- Built user login and signup functionality, enabling users to create accounts and securely access their notes from any device.

Cycloboard

<https://cycloboard.netlify.app/>

- Created a multipurpose user dashboard using React and Syncfusion, which includes details on purchases, employee and customer orders, and various charts.
- Developed a visually appealing and user-friendly dashboard that can be used by multiple businesses and applications.
- Implemented Syncfusion's components and widgets to enhance the user experience and improve the overall functionality of the dashboard.
- Utilized React's capabilities to create responsive designs and ensure optimal performance across various devices.
